Authorization Utilization

ABI Fields	UI Mapping	Description
------------	------------	-------------

Auth Group ID	Billing > Authorizations > select an authorization > "Service Code Breakdown" section	The authorization group's CR ID number.
Resource ID	Not visible in UI.	The authorization's ID number.
Auth Utilization Date	Not visible in UI.	The day within the authorization. Every authorization group has a record for each day that it is valid.
Day In Auth	Not visible in UI.	The number of days that have passed in the authorization since the authorization's start date. Not necessarily as of today, but as of any day within the authorization start and end dates.
Is Past Date	Not visible in UI.	Flags the Authorization Utilization Date as either before or after today. <ul style="list-style-type: none"> - Yes = Auth Utilization Date is before today. - No = Auth Utilization Date is today or after today.
Cumulative Authorized Hours	Not visible in UI.	A daily running total of authorized hours based on the daily prorated authorized hours.
Daily Authorized Hours	Not visible in UI.	The daily prorated authorized hours for the authorization group. Daily authorized amount = total group hours/number of days in the authorization.
Date of Service	Billing > Billing > Options > Edit Timesheet > "Date of service"	The service date of the appointment.
Worked Hours	Billing > "Work" column > "Hrs"	Hours between the start and end time of the service.
Worked Service Codes	Billing > Billing > "Service/Auth"	The service codes from the billing entry on that day of service.
Cumulative Worked Hours	Not visible in UI.	The running total of worked hours in the authorization group for each day within the duration of the authorization.
OrganizationId	Not visible in UI.	The organization's CR ID number.
